

PT65H

FLOAT & THERMOSTATIC STEAM TRAPS 1½" & 2"

DESCRIPTION:

High capacity float and thermostatic steam trap with internal air vent, designed for draining condensate from all types of low and medium pressure steam heating and process equipment. Typical applications include unit heaters, heat exchangers, driers and jacketed vessels. Horizontal installation.

AVAILABLE TYPES:

PT65H - with thermostatic air vent
PT65H S - SLR (with steam lock release)
PT65H C - with thermostatic air vent and SLR

FEATURES:

Modulating discharge.
Discharges condensate at steam temperature.
Excellent air venting (by thermostatic air vent).

USE: Saturated and superheated steam

SIZES: NPS 1½, 2

CONNECTIONS: Screwed (NPT/BSPT/BSP)

LIMITING CONDITIONS:

PMA: Max. allowable pressure	250 psig
TMA: Max. allowable temperature	425 °F
PMO: Max. operating pressure	200 psig
TMO: Max. operating temperature	425 °C
Body shell design rating	286 psig 800 °F
Cold hydro test pressure	375 psig

INSTALLATION:

Horizontal installation with flow from left to right. The trap should be installed horizontally below the drain point of the equipment in a position such that the float arm is in a horizontal plane and the float rises and falls vertically, with the flow direction as indicated on the cover.

The arrow on the nameplate should be pointing vertically upwards.

Max. differential pressure range:

PT65H (Double Orifice): 65 psi

PT65H (Rotary Orifice): 200

TRAP DISCHARGE CAPACITY IN lbs/hr
