

PPRV

Pennant Pressure Reducing Valve

DESCRIPTION :

Pennant Pressure Reducing valve is a self acting automatic control valve used for reducing higher unregulated inlet pressure to a precise constant controlled reduced outlet pressure regardless of fluctuations in the upstream side.

INDUSTRIES SERVED :

1. Food Processing Industries
2. HVAC
3. Chemical
4. Textile
5. Cement
6. Power

SIZES :

DN 25, 40, 50, 80, 100

END CONNECTION :

Integral Flanged #150, #300

TYPE :

Air Loaded

TRIM OPTIONS :

- AISI410 + Stellite (Standard)
- AISI316 + Stellite (Optional)

BODY MATERIAL :

ASTM A216 Gr.WCB

On Special Request : ASTM A351 Gr. CF8M
